Summary

I'm a Computer Science graduate with experience in AI development, game development, and quantitative trading. Skilled in C++, Python, JavaScript, I specialize in designing efficient systems. I'm currently building a large-scale Python application for a quantitative trading firm and exploring Web GPU. I thrive on turning complex problems into impactful, scalable solutions.

Work Experience

Lookfar Capital, Quantitative Researcher — Ottawa, Ontario · 2025 - Present
- Python machine learning, quantitative research. Identified significant development bias and applied solutions to the process, mitigating optimistic bias.
- Back-testing simulation system designer and developer. Exponentially sped up candidate testing and back-testing runtime, while increasing quality. Improved data visualizations

Canadian Blood Services, Junior Full Stack Developer Custom Solutions — Ottawa, Ontario · 2019 - 2020
- RESTful APIs, Microservices, SQL
- Angular reactive forms, state validating, PrimeNG styling

Rise Academy, English Teacher — Ansan , South Korea · 2022 - 2023
- Created an Elementary Computer Science Course.
- Built a MENACE with the kids. Machine-Learning Algorithm that perfects Tic-Tac-Toe

Sizzle & Sip, Co-Owner, Co-Founder — Holyrood , Newfoundland · Seasonal 2024
- Business operarions, Accounting, Marketing

Education

Memorial University , Bachelor of Science - Computer Science- AI & Games — 2022
- **Starcraft Broodwar Bot, C++** achieved with BWAPI, Top 3
- **Tron Bot, C++** placed 3rd out of 30+ class tournament.
- **Connect 4 Bot, Javascript** implemented alpha beta pruning and Zobrist hashing. Placed 4th out of 30+ class tournament.

Personal Projects

My Website ↗ — 2025
- **Portfolio Website** ExpressJS, Typescript, Mustache, MySQL, Bootstrap.

BlackJack Simulator — 2024
- **Monte Carlo Simulation, C++** Tests several popular betting strategies, illustrating the complex ways luck is hidden by trading strategies.

Mighty Electron, Global Game Jam — 2018
- **Game Design, C#** Path-find the circuits of a breadboard as an electron.
